UNDERWATER ETHERNET CABLE

DESIGN:UNDERWATER ETHERNET CABLES ARE DESIGNED FOR USE IN DEEP-WATER, SUBSEA APPLICATIONS OR WHERE HIGH-SPEED ETHERNET DATA TRANSMISSION IS REQUIRED

· Extreme ruggedness, yet flexible water-blocked construction.
· Designed for underwater use with high-speed network data, video, and sensor equipment.
· Cables can be used for bottom-laid, vertical deployment, winch systems, and ROV applications.
· Custom variations of these listed cables can be supplied with added breaking strength,, additional jackets, or neutrally buoyant constructions.

APPLICATION:
Custom designed underwater video cables for use Homeland Security, Oceanographic, Observation, and other extreme marine environments
For use with diver video systems, ROV’s, manned subs,remote monitoring and inspection of pipelines, undersea production, nuclear plants, fisheries, dams, and water ways.

ADDITIONAL OPTIONS:
Kevlar strength layer with single jacket or inner/Kevlar/outer jacket.
Specific break strengths can be ordered.
Note: diameters will increase with the order of additional layer options

OUR ADVANTAGES

EASY SOLUTIONS
ADAPTABILITY IS ONE OF OUR BEST QUALITESIT PERMIT US TO COPE WITH YOUR REQUESTON A SHORT NOTICE AND EFFEC TIVELY.

NO PRICE FIGHTS
WE ESCAPED THE OLASSICAL REBATE UNTILYOU DROP " POLICY . WE ARE PRICE WISE SINCETHE BEGINNING

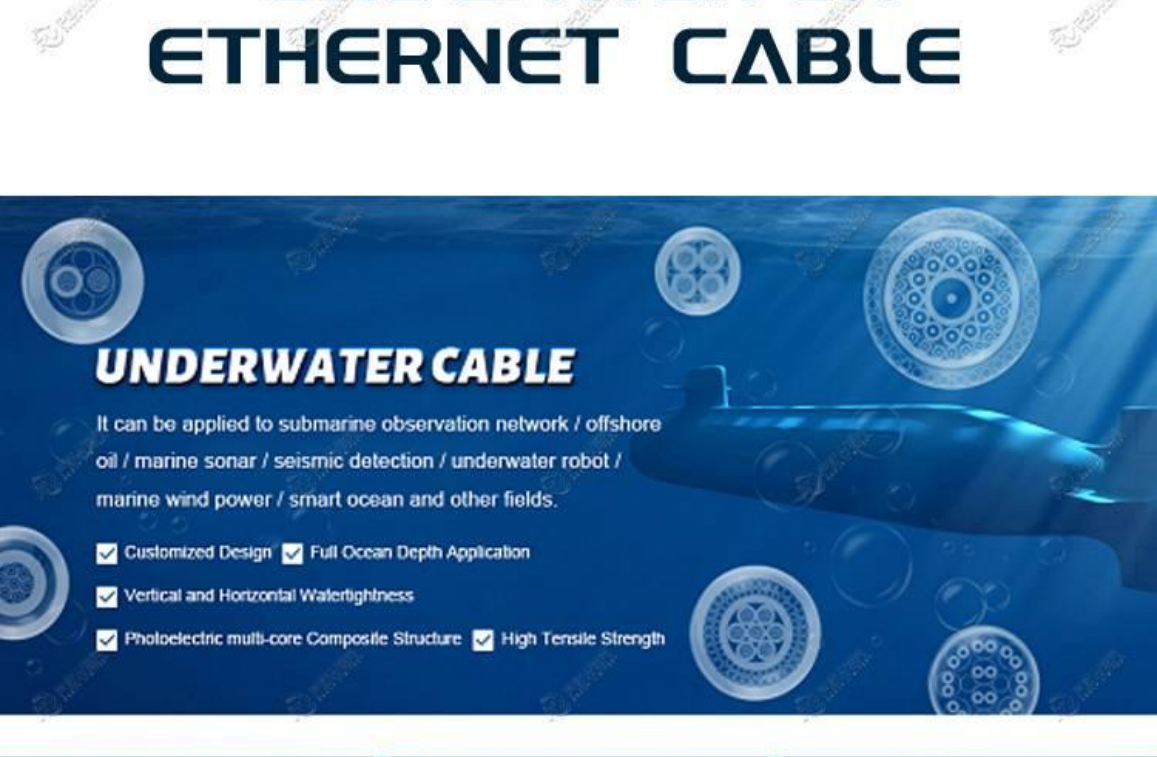
HIGH LEVEL EXPERIENCE
QUR TECHNLAL CAPABILITIES HAVE BEENTESTED FOR MORE THAN 30 YEARS ANDINDIRECT CONNECTION WITH END USERS . SO TOSAY

ENDLESS INVESTIGATION
WE CONTINUOUSLY MEASURE EVERYTHINGTEST . TEST AND TESTAGAIN . THIS HELPS NUNDERSTAND RISKS AND REWARDS . ANDBEPREPARED

NO FORTUNE TELLER
WE BASE OUR DECISIONS ON CLEAR BUSIESSPLANS , THINKING BEFORE MAKING OUR STEPSAND KEEPINGA'NOTTODO LISTFOR EVERYOVE OF THEM

TEAM BUILDING
OUR TEAMIS MADE NOT ONLY BY OUR STAFFBUTIT INCLUDES ALSO ALL OUR CUSTOMERSWEACT LIKEA TEAM WEGROW LKEA TEAMWE WINLIKE A TEAM

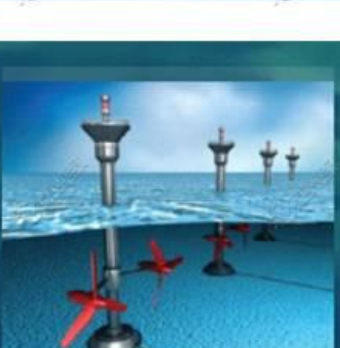
UNDERWATER ETHERNET CABLE



UNDERWATER CABLE

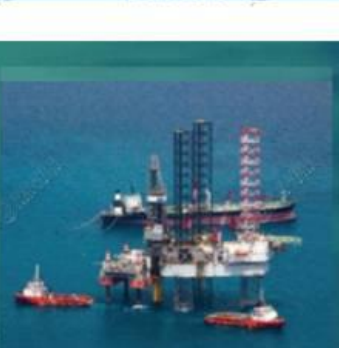
It can be applied to submarine observation network / offshore oil / marine sonar / seismic detection / underwater robot / marine wind power / smart ocean and other fields.

☑ Customized Design ☑ Full Ocean Depth Application
☑ Vertical and Horizontal Watertightness
☑ Photoelectric multi-core Composite Structure ☑ High Tensile Strength



Marine Renewable Energies

Diving



Oil and Gas

Towed Streamers

Submarines

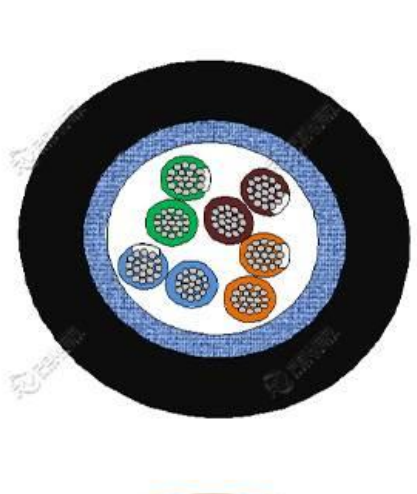
Water Treatment

ROVs & AUVs

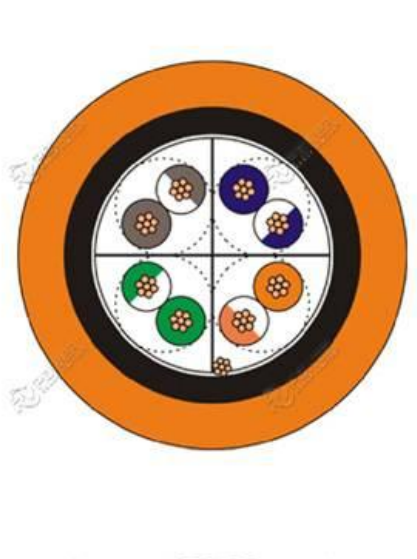
Vessels

Geophysics

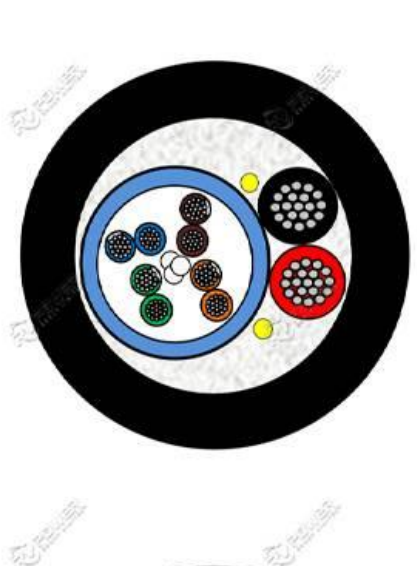
PRODUCT MIX



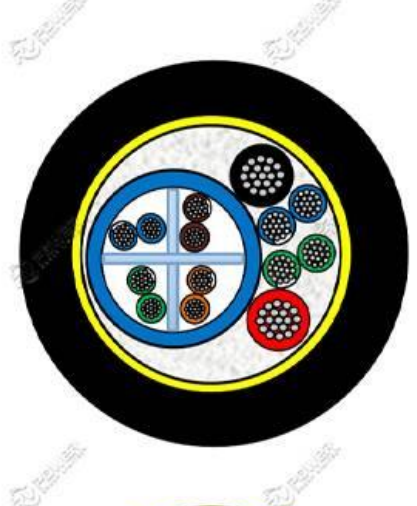
Underwater Ethernet Cable
CAT5E
Diameter : 8.0mm



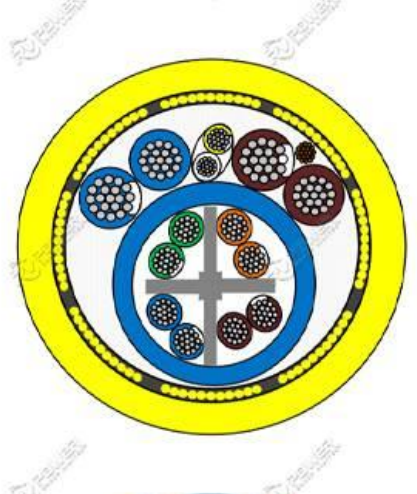
Underwater Ethernet Cable
CAT6
Diameter : 8.0-10mm



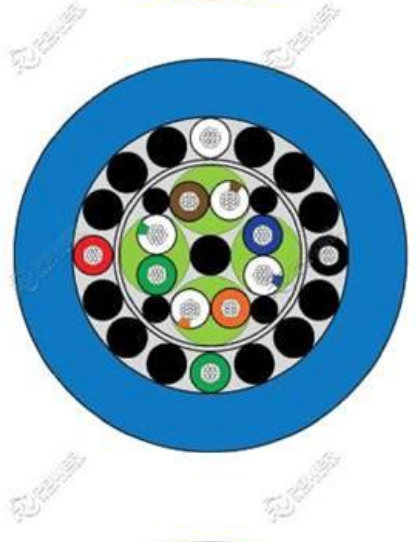
Underwater Ethernet Cable
CAT5E +2 POWER CABLE
Diameter : 10.0mm



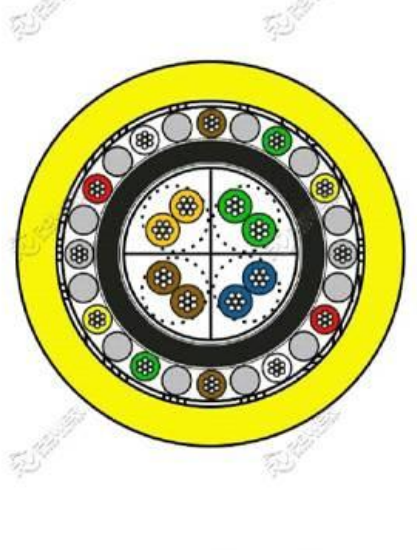
Underwater Ethernet Cable
CAT6 +2 POWER CABLE +2 Pairs Date
Diameter : 13.0mm



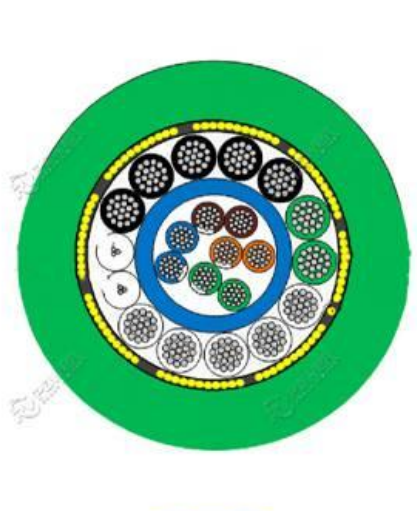
Underwater Ethernet Cable
CAT6 +4 POWER CABLE +2 Pairs Date
Diameter : 13.0mm



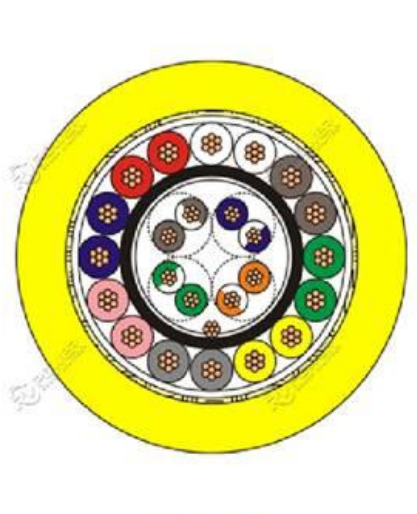
Underwater Ethernet Cable
CAT6 +4 POWER CABLE
Diameter : 14.0mm



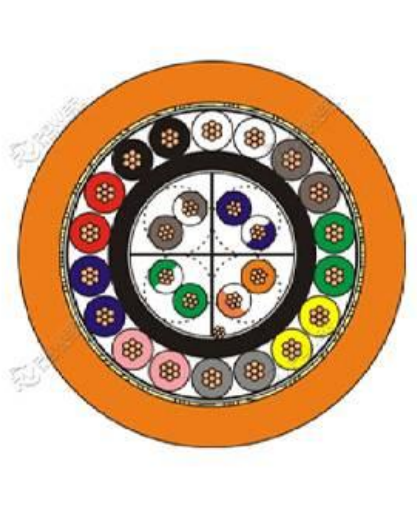
Underwater Ethernet Cable
CAT5E +12 POWER CABLE
Diameter : 14.0mm



Underwater Ethernet Cable
CAT5E +12 POWER CABLE
Diameter : 14.0mm



Underwater Ethernet Cable
CAT5E +16 POWER CABLE
Diameter : 14.0mm



Underwater Ethernet Cable
CAT5E +18 POWER CABLE
Diameter : 14.0mm

Cat5e vs. Cat6

CAT5e (CAT 5e, Category 5, enhanced) – Category 5, enhanced has the same specifications of basic CAT 5 cable however, it can handle data transfers up to 1000Mbps (1Gb/s). It is suitable for Gigabit Ethernet, and is less susceptible to near-end cross talk (Next) , the interference between two pairs in a cable measured at the same end of the cable as the interfering transmitter. Next is usually caused by crossed or crushed wire pairs.
current technology (enhanced)
less sensitive to EMI, electromagnetic interference
reduced Next, near-end cross talk
data transfer up to 1000 Mbit/s (1Gb/s)
rated for 1000-BaseT
comes in solid or stranded
CAT6 – Category 6 cable – is a more advanced version of the listed cables, it’ s performance exceeds its predecessors. CAT6 is made up of four twisted pairs of copper by a longitudinal separator, a structure that isolates each of the four pairs from each other. The separator reduces crosstalk, allows for faster data transfer, and twice the bandwidth of Cat5. CAT6 supports Gigabit Ethernet, and can operate up to 250Mhz (250 million cycles per second). CAT6 is backwards compatible, can support exisiting CAT5 and CAT5e cabling. CAT 5 is rated for 1000BASE-T.
advanced current technology
less sensitive to EMI, electromagnetic interference
reduced Next, near-end cross talk
data transfer up to 1000 Mbit/s (1Gb/s)
supports Gigabit Ethernet
comes in solid or stranded
Maximum Length
Both Cat5e and Cat6 cable specifications allow lengths up to 100 meters, but Cat6e has a lower max length (55 meters) when used for 10GBASE-T (10 Gigabit Ethernet). In order to run 10GBASE-T for 100 meters, Category 6a cable, or Augmented Category 6, cables need to be used. Cat6a cables allow performance up to 500 MHz.
If network infrastructure requires covering distances larger than 100 meters, repeaters or switches are required to amplify the signal.
Speed
As mentioned previously, Cat6 cables can be used to power 10GBASE-T, or 10 Gigabit Ethernet, while the maximum that Cat5e cables can support is 1GBASE-T, or 1 Gigabit Ethernet. This is because Cat6 cables perform up to 250 MHz, more than twice that of Cat5e cables (100 MHz).

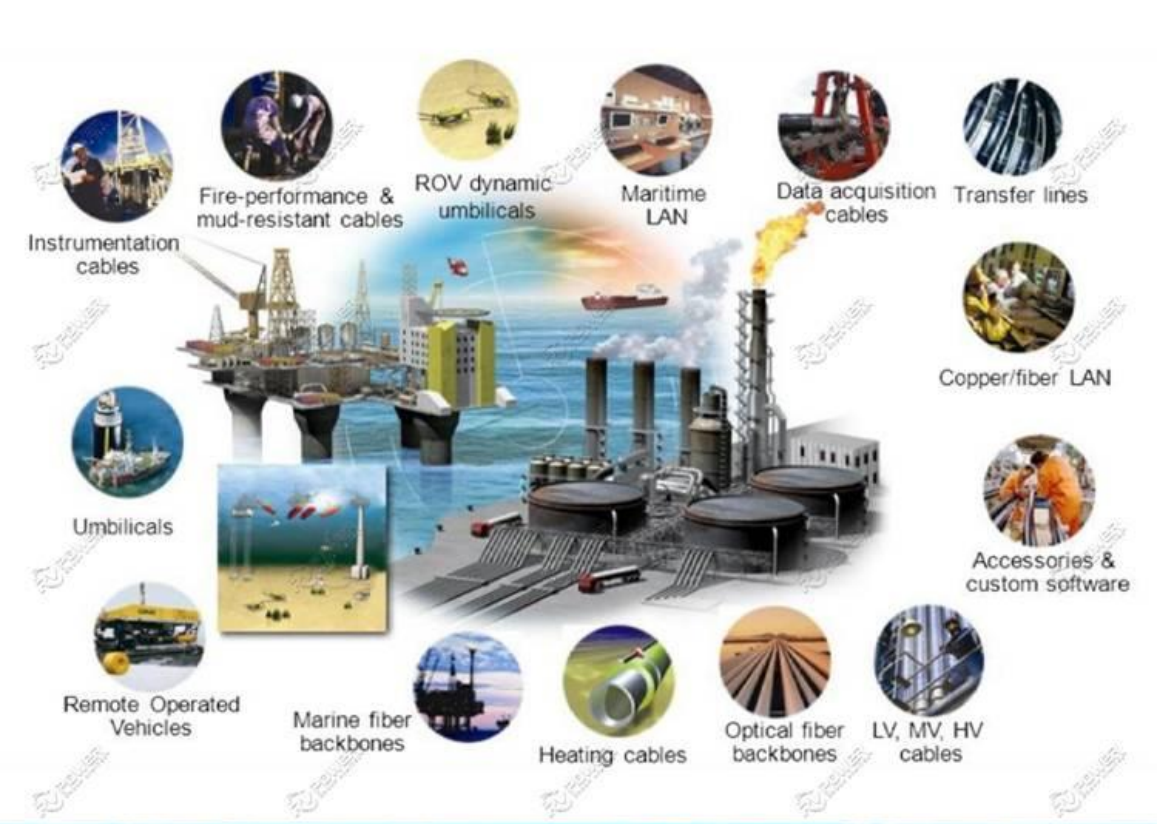
	Cat5e	Cat6
Frequency	Up to 100MHz	0 - 250 MHz (minimum); 500 MHz maximum
Maximum Cable Length	100 meters	100 meters for slower network speeds (up to 1,000 Mbps) and higher network speeds over short distances. For Gigabit Ethernet, 55 meters max, with 33 meters in high crosstalk conditions.
Performance	Less crosstalk/interference than CAT5. Potentially more interference than CAT6.	SNR higher and better
Theoretical Top Speed	1000Mbps	10 Gbps over 33-55 meters (110-165 feet) of cable
Standard gauges in conductors	24-26 AWG	24 AWG
Connectors	RJ45 (aka 8P8C)	RJ45 (aka 8P8C)
Common usage	Personal home usage	Office networks, home networks, phone lines

CABLES FOR MARITIME AND UNDERWATER TECHNOLOGIES

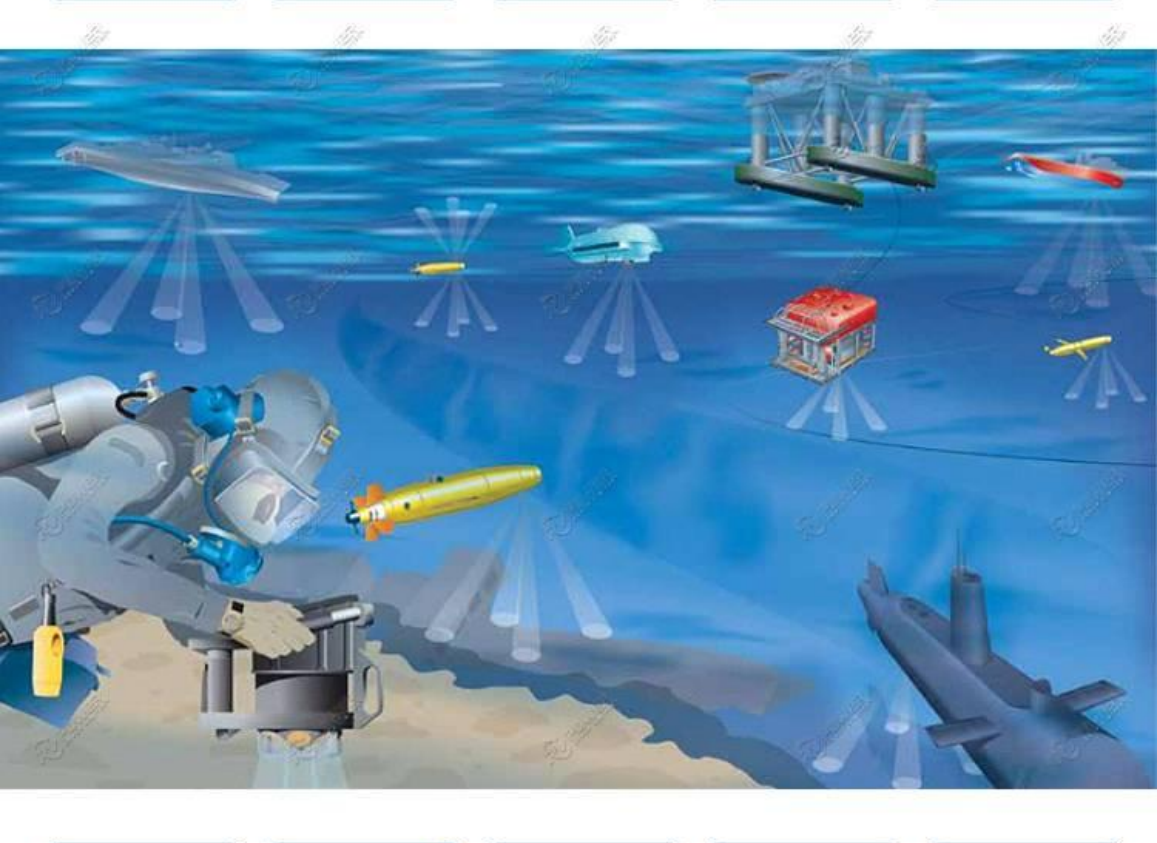
Underwater technology, especially at great depths, is challenging. ROVs, used for underwater inspection, survey and search work,Require cables with high performance and reliability for efficient and accurate control, providing the required strength to support the vehicle.Cables and tethers used for Remotely Operated Vehicles represent the vital connection between the vehicle and the vessel.These products include: neutrally buoyant tethers, Kevlar strength member cables, hybrid cables.
We has many years of knowledge and experience manufacturing cables for the ROV.We offer a complete range of standard communication, video, power and combined service cables, designed to meet the extreme pressures of the subsea environment. Whatever your diving application needs, we can create flexible, cost-effective engineering solutions to suit your requirements and your budget.

SUBSEA CABLES TYPE

ROV Tether Cable
ROV Umbilicals Cable
Diver umbilical
Pool robotic cleaner cable
Neutrally Buoyant Cables
Diver Communications Cable
Underwater Video Cable – Diver
CCTV Inspection Crawler Video Cables
Underwater Fiber Optic Cable
Underwater Instrumentation Cable
Underwater Multiconductor Power & Control Cable
Underwater Ethernet Cable
Sidescan Sonar Tow Cable
Coax Oceanoghraphic Tow Cable
Push-rod Cables
Polyurethane or Polyethylene Jacketed Cables
Composite Underwater Communication Cables
PUR underwater umbilical hybrid Optical
Custom Cable Designs



UNDERWATER ETHERNET CABLE



DETAIL DISPLAY

ONE

LONG DISTANCE DATA TRASMISSION

Conductors: Stranded Pure/ tin copper conductors for flexibility and corrosion resistance. Light weight, low dielectric copolymer insulation with great mechanical and moisture resistance.

TWO

RESILIENT, FLEXIBLE AND NEUTRALLY BOUYANT ONE SINGLE LONG CONTINUOUS LENGTH REQUIRED

Custom ROV cables using tried and proven components for power, video, data, etc., which areavailable for your design, providing shorter lead times.

THREE

WATER BLOCKED CABLE

Water block flooding compounds offered to each specific design are light wgt and fully encapsulating, design for extreme ocean depths and pressures, salt and oil resistant elastomeric and thermosetting

FOUR

HIGH BREAKING STRENGTH

Strength Layer: Light weight Kevlar fibers are designed into each cable construction to meet specific ROV intended use for maximum strength and longevity.

FIVE

SMALL SIZED. LIGHT . PRESSURE RESISTANT . ABRASION/ EROSION RESISTANT

Jacket Materials are chosen for optimal bonding, moisture and mechanical resistance. Each ROV cable is uniquely designed for specific ROV types using PE, TPE, PUR, and foam variations for flotation.

OIL RESISTANT
FLAE RESISTANT
HF HALOGEN FREE
COLD RESISTANT
ABRASION RESISTANT
OZONE RESISTANT
UV RESISTANT
MICROBE RESISTANT
MUD RESISTANT
WATER RESISTANT
