

DIVER UMBILICAL

MULTIPURPOSE DIVER UMBILICAL WITH GAS HOSE, PNEUMO & CABLE

Description:
Several types of hoses are available to suit specific applications taking into account pressure rating, flexibility and abrasion resistance. Hoses are braided with cables to meet all source, communications and video requirements. Several mounting and electrical connection terminations are available to meet specific requirements.

Available in a range of standard 50, 100, 150 and 200 meter cord dive cables, although we can provide custom hookahs in various lengths.

There are different settings and customization for diving hookahs, with options for air, pneumo, communications, mini TV and hot water.

CABLES FOR MARITIME AND UNDERWATER TECHNOLOGIES

Underwater technology, especially at great depths, is challenging. ROVs, used for underwater inspection, survey and search work, require cables with high performance and reliability for efficient and accurate control, providing the required strength to support the vehicle. Cables and tethers used for Remotely Operated Vehicles represent the vital connection between the vehicle and the vessel. These products include: neutrally buoyant tethers, Kevlar strength member cables, hybrid cables.

We have many years of knowledge and experience manufacturing cables for the ROV. We offer a complete range of standard communication, video, power and combined service cables, designed to meet the extreme pressures of the subsea environment. Whatever your diving application needs, we can create flexible, cost-effective engineering solutions to suit your requirements and your budget.
